

**FOR IMMEDIATE RELEASE**

## **Miami Climate 365 Announces Event Lineup for Miami Climate Week 2026**

**March 14 to 21, 2026 | More than 40 countywide community events will mobilize Miami-Dade to address extreme heat, flooding, and drive local climate solutions**

**MIAMI (March 5, 2026)** — [Miami Climate 365](#) (MC365), a year-round initiative that unites public, private, and community leaders to strengthen Miami-Dade’s response to climate risks, today announced the official lineup for the second annual Miami Climate Week (MCW) 2026, taking place March 14 to 21 across Miami-Dade County.

With rising temperatures, sunny-day flooding, and sea level rise increasingly reshaping daily life in South Florida, Miami Climate Week is a ground-up showcase of community-driven climate solutions that brings together community organizations, researchers, public agencies, and residents to drive real-world action.

[Miami Climate Week 2026](#) will feature more than 40 events led by over 50 community-based organizations, universities, public agencies, and cultural institutions across Miami-Dade County. Workshops, forums, and hands-on activities throughout the week will highlight solutions such as resilient infrastructure to mitigate flooding, strategies to address extreme heat, emerging climate research, and neighborhood-level nature-based solutions.

**Two major convenings will anchor the week’s programming: the Resilience 365 Conference**, hosted by the University of Miami Climate Resilience Institute on March 17-18; and **Impact in Action: Community Meets Research with the Resilient305 Collaborative**, on March 19 at The Kampong. These events will bring together national and regional leaders, researchers, community nonprofits, and public sector partners to examine emerging approaches to climate resilience and translate research and data into practical solutions for Miami-Dade communities.

“Building resilience requires a whole-of-society approach. This year we examine the intersection of gray and green infrastructure, finance, and public health,” said Michael Berkowitz, Executive Director of the Climate Resilience Institute at the University of Miami. “Miami Climate Week and the Resilience 365 Conference create a space for researchers, policymakers, and community leaders to focus on what works. By bringing together the people generating the data with those implementing solutions on the ground, we can move from research to real-world impact.”

The week’s programming reflects the growing collaboration between research institutions, government, and community organizations working on climate solutions across the region.

“Climate action in Miami is not theoretical. It is measurable, it is local, and it is happening in real time,” said David A. Duckenfield, executive director of Miami Climate 365. “From neighborhood organizations to research institutions, leaders across Miami-Dade are working block by block to strengthen communities and advance practical solutions. Miami Climate Week highlights that progress and turns ideas into action.”

**Miami Climate Week 2026 signature events include:**

**Climate Demands More from Culture at The Bass Museum (March 14, 2:00–3:00 p.m.):** Hosted at The Bass Museum in Miami Beach, Anais Reyes, Deputy Director of the Climate Museum, and eco-artist Xavier Cortada will discuss how artists and cultural institutions can move beyond awareness toward meaningful climate action. Moderated by Adam Roberti of the Cortada Foundation, the conversation will examine the role cultural leaders can play in addressing sea level rise, extreme heat, and climate inequities in Miami. *Location: The Bass Museum | 2100 Collins Ave, Miami Beach, FL 33139. This event is free and open to the public; RSVP is encouraged via the event page at [MiamiClimate365.com](https://MiamiClimate365.com).*

**Eco Block Party at Miami Worldcenter (March 15, 2:00–4:00 p.m.):** Hosted by the City of Miami Mayor’s Office and District 2 Commissioner Damian Pardo, this community-focused event will connect residents with city experts and local partners working on solutions for extreme heat, flood mitigation, and reducing plastic waste. The program will feature music, food, and climate resilience resources, with participation from organizations including Catalyst Miami, Compost for Life, the Women’s Fund Miami-Dade, and others. *Location: Miami Worldcenter Plaza | 652 NE 2nd Ave, Miami, FL 33132. This event is free and open to the public; RSVP is encouraged via the event page at [MiamiClimate365.com](https://MiamiClimate365.com).*

**Impact in Action: Community Meets Research with the Resilient305 Collaborative (March 19, 3:30–6:00 p.m.):** Held at The Kampong in Coconut Grove, this event will highlight the work of the Resilient305 Collaborative (R305C), a partnership uniting universities, community organizations, local governments, and business leaders across Greater Miami and The Beaches to advance climate research and action. The program will unveil findings from a year of collaborative research between community nonprofits and scientists from the University of Miami and Florida International University and debut the Miami Resilience Meter, an online dashboard tracking neighborhood conditions across more than 17 indicators, including flooding frequency, heat exposure, and access to transit. The event will also invite additional nonprofits to join the Collaborative’s research network to strengthen the data and insights guiding climate solutions across Miami. *Location: The Kampong | 4013 Douglas Rd, Miami, FL 33133. This event is not open to the public; media interested in attending must RSVP in advance.*

**Climate Capsule at the Historic Hampton House (March 20, 10:00 a.m.–2:00 p.m.):** Hosted at the Historic Hampton House in Brownsville, this two-part program will explore inclusive climate resilience and climate migration. The first session focuses on building a disability-accessible climate resilience plan for Miami, convening advocates, emergency

management leaders, and public health experts. The second session examines climate relocation and its human rights implications locally and globally, featuring speakers from FIU's Commons for Justice and Human Rights Watch. *Location: Historic Hampton House | 4240 NW 27th Ave, Miami, FL 33142. This event is free and open to the public; RSVP is encouraged via the event page at MiamiClimate365.com.*

**Sustainable Thrift & HiFi at Reserved MIA (March 20, 7:00–11:00 p.m.):** Hosted by Reserved MIA in partnership with Istituto Marangoni Miami, this evening program explores how thrifting, upcycling, and circular fashion can contribute to climate resilience. The event will feature a panel discussion on thrifting as a sustainability strategy, a live upcycled upholstery demonstration by Marangoni students, and a circular economy market highlighting local thrift vendors. *Location: Reserved MIA | 7200 NW 2nd Ave, Miami, FL 33150. This event is free and open to the public; RSVP is encouraged via the event page at MiamiClimate365.com.*

**Day in the Dirt at The Underline (March 21, 8:00–10:30 a.m.):** Hosted by Friends of The Underline and Miami Climate 365, this volunteer event invites community members to help maintain native gardens along Miami's 10-mile urban trail. Participants will work alongside horticulture staff to plant and maintain native landscaping that supports biodiversity, reduces urban heat, and improves stormwater absorption while learning about South Florida's native plants and wildlife. *Location: Vizcaya Metrorail Station | 3205 SW 1st Ave, Miami, FL 33145. This event is free and open to the public; RSVP is encouraged via the event page at MiamiClimate365.com.*

**Engineering Coastal Resilience at Vizcaya Village (March 21, 11:00 a.m.–1:00 p.m.):** Hosted at the Historic Garage at Vizcaya Village, this panel will explore innovative approaches to coastal resilience, featuring The REEFLINE, City of Miami District 2 Commissioner Damian Pardo, and Vizcaya Museum & Gardens. Speakers will discuss hybrid reef infrastructure, the Living Seawall initiative and Morningside shoreline project, and Vizcaya's preservation-focused resilience strategies such as deployable storm surge barriers, highlighting how ecological restoration, public infrastructure, and historic preservation intersect in Miami's response to sea level rise. *Location: Vizcaya Village | 3250 S Miami Ave, Miami, FL 33129. This event is free and open to the public; RSVP is encouraged via the event page at MiamiClimate365.com.*

These events are among more than 40 community-driven activities scheduled across Miami-Dade County throughout the week. A full list of Miami Climate Week events, including full event descriptions, locations, and directions, is available at [MiamiClimate365.com](https://MiamiClimate365.com).

Through Miami Climate Week, MC365 connects science, public policy, and grassroots leadership to strengthen Miami-Dade's ability to prepare for climate risks. Organizations and residents are invited to host, co-host, or participate in events that advance practical solutions and elevate local leadership.

The week also supports broader regional efforts tied to [Miami-Dade County's Risk and Resilience Tech Hub](#), a regional initiative advancing climate technology, research, and implementation through collaboration among government, industry, academia, and philanthropy.

The inaugural Miami Climate Week, held in March 2025, convened more than 2,600 participants across 43 events hosted by 58 partner organizations throughout the region. The first Resilience 365 Conference convened more than 100 speakers and 300 attendees to examine topics ranging from clean energy innovation to equitable climate adaptation.

### **About Miami Climate 365**

Miami Climate 365 (MC365) is a year-round initiative focused on strengthening community-driven efforts to address environmental challenges across Miami-Dade County. The collaborative effort unites stakeholders around practical solutions to extreme heat, flooding, and related climate risks. Miami Climate Week serves as the flagship event of the MC365 initiative, showcasing progress and mobilizing action. For more information, visit [www.miamiclimate365.com](http://www.miamiclimate365.com).

### **About University of Miami Climate Resilience Institute**

The Climate Resilience Institute supports interdisciplinary research and education to deliver solutions to climate impacts and environmental stressors in partnership with industry, government, and community stakeholders. For more information, visit [resilience.miami.edu](http://resilience.miami.edu).

### **About Miami Climate Week**

Miami Climate Week is the signature event of Miami Climate 365, designed to mobilize residents, institutions, and organizations around collective climate action across Miami-Dade County. Through workshops, forums, and volunteer opportunities, the week strengthens partnerships and advances long-term strategies. For more information, visit [www.miamiclimate365.com/about-mcweek](http://www.miamiclimate365.com/about-mcweek).
